

Golub Capital Middle Market Report

FEATURING THE GOLUB CAPITAL ALTMAN INDEX

Revenue in the U.S. Middle Market Continues to Grow at 4.62%, With Information Technology Expanding at 9.85%, According to Golub Capital Middle Market Report

Overall earnings show slight decline of 0.66% during the first two months of Q3 2016, driven by Healthcare sector

Index provides early insight into financial performance of public companies and GDP in advance of earnings season

Middle market private companies in the Golub Capital Altman Index increased revenues by 4.62% and earnings (defined as earnings before interest, taxes, depreciation and amortization, or "EBITDA") declined by 0.66% during the first two months of the third quarter of 2016. This is compared to increases of 7.38% in revenues and 2.01% in earnings in the second quarter of 2016.

Lawrence E. Golub, CEO of Golub Capital, said "Revenue continues to grow across all sectors, albeit slower than in previous quarters. Profit margins are still under pressure, despite positive GDP growth. One bright spot in our Golub Capital Middle Market Index for Q3 2016 is Information Technology, where we are seeing revenue growth of 9.85%. We saw strong performance in this sector last quarter too, stemming from productivity enhancements coming from the adoption of cloud-based software services. The IT sector has also contributed to job creation – from software engineers to salespeople and managers."

Dr. Altman said, "Our results for the third quarter 2016 show that all sectors experienced a slowdown in EBITDA growth compared to last year, with the Healthcare sector being the leading contributor to the downturn with a decline of 8.4%. Average revenue growth across all sectors was up at 4.62%, but it was still lower than the previous quarter at 7.4% and below our quarterly average growth rate of 8.6%. While the companies in the middle market are profitable, this is the first quarter since we began tracking this data in 2012 that EBITDA was essentially flat on a year-over-year basis."

GOLUB CAPITAL ALTMAN INDEX HIGHLIGHTS

Year-Over-Year Growth	REVENUES	EARNINGS

Healthcare	3.63%	(8.04%)
Industrials	4.21%	(0.77%)
Information Technology	9.85%	1.97%

REVENUE GROWTH

EARNINGS GROWTH

The Golub Capital Altman Index, which is produced by Golub Capital in collaboration with renowned credit expert Dr. Edward I. Altman, is the first and only index based on actual sales and earnings data for middle market companies. It measures median revenue and earnings performance from the data of more than 150 private U.S. companies in the loan portfolio of Golub Capital, a leading middle market lender. Reported shortly before public company quarterly earnings season, the index has served as a reliable indicator of the overall growth rates in revenue and earnings of public companies in market indexes such as the S&P 500 and S&P SmallCap 600, as well as quarterly Gross Domestic Product ("GDP"), according to statistical back-testing dating back to 2012, when data began to be tracked.

We believe the results (1) are representative of the general performance of middle market companies, which are a major contributor to U.S. private sector employment, (2) can be easily compared to the performance of the public companies that make up major stock indexes, (3) are relevant to the aggregate economic performance of the U.S. economy, and (4) provide timely information for the investment community.

Importantly, the size and diversity of the Golub Capital loan portfolio ensures that the confidentiality of all company-specific information used in the report is maintained in both the aggregate and industry segment data.

The companies in the Golub Capital Altman Index operate in a wide range of industries, and aggregate results are provided for the total universe and by industry segment. Given the index's limited exposure to Financials, Utilities, Energy and Materials, calculations are made for the public indexes both including and excluding these sectors (for the latter, see charts marked "S&P 500 Adjusted" and "S&P 600 Adjusted").

About The Golub Capital Middle Market Report

The Golub Capital Middle Market Report analyzes the results of the Golub Capital Altman Index, which measures the median revenue and earnings growth of more than 150 privately owned companies in the Golub Capital loan portfolio for the first two months of each calendar quarter. It compares these results to the financial performance of public companies in well-known market indexes, including the S&P 500 and S&P SmallCap 600, as well as the quarterly Gross Domestic Product. The index is produced by Golub Capital in collaboration with renowned credit expert Dr. Edward I. Altman. For more information, including a description of the methodology used to create the report, please visit golubcapital.com/middle-market-report.
